SUMMARY

Computer Science Engineering graduate with professional experience in frontend and full-stack software development. Experienced in Java, JavaScript, React.js, Node.js, Express.js, SQL, MongoDB, REST APIs, authentication, and role-based access control. Hands-on experience across the Software Development Life Cycle (SDLC), building responsive web applications, integrating APIs, developing database-driven workflows, and working in Agile software development environments. Strong programming, analytical, logical, and problem-solving skills.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js, REST APIs, JWT, Role-Based Access Control

Databases: MySQL, MongoDB

Tools/Cloud: Git, GitHub, AWS (EC2, S3, Lambda, RDS), Nginx, PM2

Concepts: Object-Oriented Programming (OOPs), Database Management, Authentication, Authorization, Agile Development

PROFESSIONAL EXPERIENCE

Full Stack Developer

Sep 2026 – Oct 2026

JAC MediaLand IT Solutions, Erode, India

- Developing JAC CampusOS, a school management SaaS platform covering academic management, student information, attendance, examinations, fees, transport, hostel, and communication workflows.
- Contributing to full-stack development including responsive interfaces, REST API integration, backend services, database-driven workflows, testing, debugging, and feature delivery.
- Working with Git-based development and contributing to modular, production-ready application features.

Software Engineer (Full-Time) – Frontend Developer

Apr 2026 – Aug 2026

SRIVYN Platforms PVT LTD, Telangana, India

- Developed responsive healthcare web application modules using React.js and integrated REST APIs for multiple healthcare portals.
- Collaborated with backend developers to integrate APIs, validate request/response flows, resolve application bugs, and contribute to Agile feature development, testing, and releases.

PROJECTS

Digital Trial Card & Workflow Management System

Sakthi Auto Component Limited

- Developed a full-stack digital trial card and workflow management system using React.js, TypeScript, Node.js, Express.js, and Microsoft SQL Server for multi-department trial processes.
- Implemented JWT authentication with role-based and department-based authorization for Admin, HOD, and User access levels.
- Developed REST APIs and database workflows for trial management, inspections, document management, dashboards, audit logging, PDF reports, and Excel exports.
- Configured Nginx as a reverse proxy for frontend/API traffic and used PM2 for Node.js backend process management.

Student Online Exam Portal

- Developed a full-stack examination platform using React.js, Node.js, Express.js, and MongoDB with authentication, role-based dashboards, automated evaluation, and admin controls.
- Built responsive interfaces with real-time validation, score generation, and exam management functionality.

Student Activity Monitoring Portal

- Developed a web application for students and faculty to manage Student Activity Points with role-based submission, approval, and profile workflows.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

CGPA: 7.53

Kongu Engineering College, Perundurai, Tamil Nadu

CERTIFICATION & APPLICATION

MongoDB Associate Developer Certificate (Node.js)

- Learned MongoDB data modeling, CRUD operations, querying, and Node.js database integration.
- Applied MongoDB concepts while building full-stack applications with Node.js, Express.js, and REST APIs.
- Used database design and query concepts to support application workflows and structured data management.
