## Technical Skills

### Programming Language

- Java
- Python

### Frameworks

- React.js
- Node.js
- Express.js

### Database

- MySQL
- MongoDB
- Oracle Database

### Development Tools

- Github
- AWS(EC2, S3, Lambda, RDS)

## Education

### Bachelor Of Engineering:

Computer Science and Engineering  
Kongu Engineering College  
Perundurai. **CGPA: 7.50**

### Higher Secondary Certificate:

Kongu Vellalar Matriculation  
Higher Secondary School,  
Perundurai.  
**Percentage: 80%**

### Secondary School Leaving Certificate:

Kongu Vellalar Matriculation  
Higher Secondary School,  
Perundurai. **Percentage: 63%**

## Certifications:

MongoDB Associate  
Developer Certificate(Node.js)

## Areas of Interest

- Web Development
- Database Management
- SQL Query Optimization

# GOKUL S

## Junior Web & Database Developer

 [GitHub](#)  [Linkedin](#)  [Portfolio](#)

## Career Objective

Passionate and dedicated fresher seeking a Junior Web & Oracle Database Developer internship to apply my knowledge of HTML5, JavaScript, and Oracle SQL in developing responsive, data-driven applications. Eager to contribute, learn from industry professionals, and build impactful digital solutions.

## Experience

**Freelance - Backend Developer (Sakthi Auto Component Limited, Tiruppur, India )**

**11/2025 - Present**

- Developed a backend system using Node.js and MySQL to manage multi- department approval workflows.
- Implemented JWT authentication and role-based access control to ensure secure and structured data handling.
- Added automated notifications and stage-transition logic to streamline request movement between departments.

**Freelance - Backend Developer (Global Matriculation Higher Secondary School, Kangayam, India )**

**01/2025 - 04/2025**

- Designed and managed application databases using Supabase and MongoDB.
- Developed optimized backend APIs ensuring smooth and secure data flow.
- Built an Admin Dashboard enabling staff to easily add, update, and manage website content.

## Projects

- **Student Activity Monitoring Portal:** A web application designed to help students and faculty manage and track Student Activity Points (SAP) across various co-curricular and extra-curricular activities, with role-based HTML templates for submissions, approvals, and profile views.
- **Student Online Exam Portal:** Developed a full-stack online exam portal using React.js, Node.js, Express, and MongoDB to streamline student assessments. Built secure user authentication, role-based dashboards, and automated evaluation workflows. Implemented responsive UI components for an intuitive exam-taking experience. Integrated real-time validations, score generation, and admin controls for efficient exam management.
- **Weather Monitoring System:** A React-based web application for real-time weather and air quality monitoring. Displays temperature, humidity, and AQI using a clean, responsive UI built with Tailwind CSS

## Achievements

- Won **First prize** in the inter-department level event **Thinkathon'24**, conducted by AI Department in Kongu Engineering College.
- Won **Second prize** in a 36 hours Hackathon in Kongu Engineering College.
- Won **Third prize** in Ideathon'24 at Kongu Engineering College.
